

Turn Operational Chaos Into Clear Workflow

Many funeral homes rely on multiple systems, spreadsheets, and manual processes to manage their operations.

This can lead to:

- Duplicate entry across systems
- Scheduling confusion for services, staff, and resources
- Time-consuming paperwork and document management
- Limited visibility into case progress and financial details
- Disconnected communication between team members

When information lives in different places, it slows down your team and creates unnecessary complexity.

What TMS Helps You Do

Manage Every Case

Track cases from first call to final follow-up using tools built specifically for funeral home workflows.

Coordinate Staff & Services

Schedule staff, vehicles, rooms, and services from a centralized digital calendar.

Send Forms & Collect eSignatures

Send documents to families instantly and collect digital signatures securely from anywhere.

Reduce Duplicate Data Entry

Enter information once and automatically populate forms, documents, and systems.

Track Financials

Maintain clear visibility into case balances, revenue, and reporting.

Built for the Way Funeral Homes Work

TMS is designed specifically for funeral professionals and integrates with systems you already use.

Key capabilities include:

- Case management and workflow tracking
- Document management and digital signatures
- Staff scheduling and task management
- Reporting and operational insights
- Integrations with accounting tools and websites

Because TMS is fully cloud-based, your team can securely access information from anywhere on any device.

Why Funeral Homes Choose TMS

- Save hours of administrative work on every case
- Improve communication across your team
- Eliminate duplicate entry between systems
- Gain clear visibility into operations and finances
- Provide a smoother experience for families

Many funeral homes save hours per case by managing paperwork and workflows digitally instead of manually.

Unlike traditional case management tools, TMS helps manage your entire operation—including staff, tasks, and resource scheduling.
